

## Reading of the Electro Dermal Testing

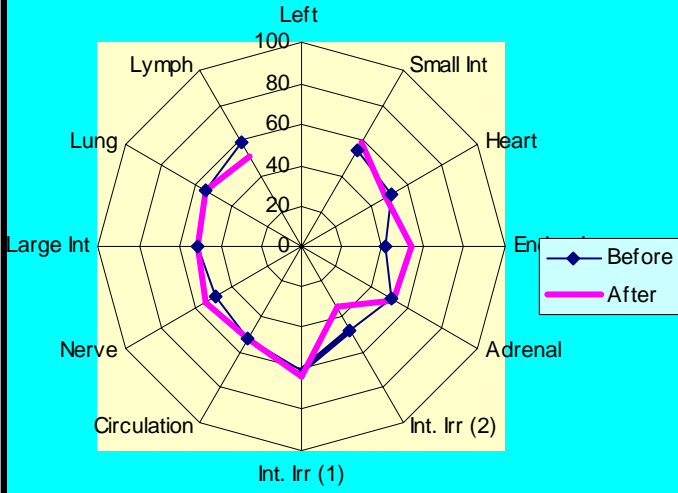

There are included two sets of three individuals out of a total of twenty one individuals that had been tested. The graphs represent tests done on initially on January 4, 2004 and then two weeks after starting the Barley Gold Flush, January 17, 2004. Individuals are recognized by the numbers 1-3. The tests are conducted on both the left and then the right side of the individual's body. Areas that are blanked out were originally highlighted and did not scan correctly. The correct orders of tests are as follows:

| <b>Left</b>  | <b>Right</b> |
|--------------|--------------|
| Repro        | Repro        |
| Bladder      | Bladder      |
| Kidney       | Kidney       |
| Gall Bladder | Gall Bladder |
| EFA          | EFA          |
| Skin         | Skin         |
| Stomach      | Stomach      |
| Joints       | Joints       |
| Liver        | Liver        |
| Spleen       | Pancreas     |
| Metabolism   | Metabolism   |

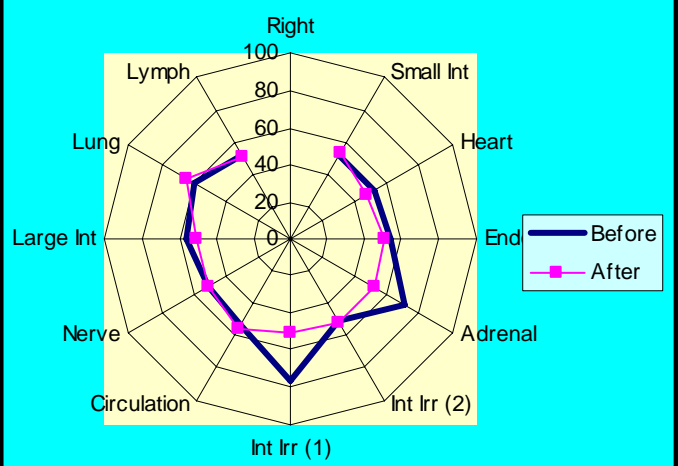

| <b>Left</b>  | <b>Right</b> |
|--------------|--------------|
| Small Int    | Small Int    |
| Heart        | Heart        |
| Endocrine    | Endocrine    |
| Adrenal      | Adrenal      |
| Int. Irr (2) | Int Irr (2)  |
| Int. Irr (1) | Int Irr (1)  |
| Circulation  | Circulation  |
| Nerve        | Nerve        |
| Large Int    | Large Int    |
| Lung         | Lung         |
| Lymph        | Lymph        |

The ideal meridian reading is between 50-60. Scores that are higher after the two week testing show elimination organs are being stress higher than original as well as other organs that are either repairing or trying to increase efficiencies thereby causing the higher stress levels. The Barley gold cleansing is occurring.
